### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

Delete the abstract and insert therefore:

A chemical-mechanical polishing (CMP) system and method includes pumping polishing slurry from a CMP apparatus through a sampling tube to an endpoint detection apparatus during a polishing operation, and flushing the sampling tube while a polishing operation is not in progress. The flushing of the sampling tube is commenced in accordance with a control signal from the endpoint detection apparatus terminating the polishing operation; the flushing is terminated in accordance with a starting signal to the CMP apparatus. The pump, which pumps a sample of slurry into the endpoint detection apparatus, continuously pumps slurry and/or water. Clogging of the slurry sampling tube is thus eliminated, thereby ensuring robust operation of the CMP apparatus. Contamination of the sampling tube is also avoided, so that the system may reliably provide sensitive endpoint detection and process control, even when a film of low pattern density is polished.

### **REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance: prior art of record considered as a whole alone or in combination neither anticipates nor renders

obvious, providing a slurry flushing apparatus for flushing slurry from the sampling tube while a polishing operation is not in progress, in combination with the rest of the limitations in claim 1; prior art of record considered as a whole alone or in combination neither anticipates nor renders obvious, a first flow control valve connected to the slurry sampling tube for controlling a flow of water into the slurry sampling tube to flush slurry from the sampling tube while the polishing operation is not in progress and a second flow control valve connected to the first control valve by a flush tube for controlling the flow of water to the first control valve, in combination with the rest of the limitations in claim 11.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung V Nguyen whose telephone number is 703-305-0036. The examiner can normally be reached on M-F, 6:30-3:00.

6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J Hail can be reached on 703-308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
